

PRESS RELEASE

CES 2006

January 5th 2006

Bolzano Villettri will launch the production of a versatile small-sized Design Line

Las Vegas, Nevada, January 5, 2006 – Bolzano Villettri will present audiophiles with a concept of the future Design series. The set consists of two floorstanders, DN 680 and DN 660, and the center channel DN 620.

The highlights of the Design Line are the utilization of counter-aperture in DN 680 and semi-counter-aperture in DN 660 and DN 620 to obtain 360° sound output, and as a consequence, more vivid and more panoramic sound performance at all frequency ranges.

Design Line will definitely be adored both by music worshippers and home theater lovers seeking not only impressive performance, but also a fashionable and elegant appearance of their devices. One of the benefits of the series is its small dimensions, which will enable it to blend with any surroundings, especially limited spaces. The manufacturers state that this is a definitely convenient and timely solution, since the consumer is currently more drawn by minimalism and simplicity trends in design; and Design Line coming in Maple and Madreperla will fit any customer's stylish interior.

The elaborations by Bolzano Villettri will facilitate getting more advantages than any other brand can provide. The major constituents of success among keen consumers are cutting edge technology and adherence to the principles of reliability. By being flexible to market demands, the company delivers core customer requirements by constantly looking to improve the manufacturing process.
