

**PRESS RELEASE**

**CES 2006**

**January 5<sup>th</sup> 2006**

**At CES 2006 become fascinated by the Great Torre – a Floorstander of the Campanile series from Bolzano Villettri**

Las Vegas, Nevada, January 5, 2006 - At Alexis Park Booth #2153, Bolzano Villettri will be presenting the audience with its Torre loudspeaker (HF 3005), the outstanding item of the Campanile series .

“Grandeur” seems to be the most precise epithet that can be used to refer to the Torre. Its height of over a meter and a half absorbs the inquisitive and increasingly informed audience. Everybody is allured by a chance to hear the purest, most volumetric sound of this speaker supported by innovative construction the world has never seen before

RoundStream Technology, PilotEdge and ChannelFlow – real novelties that Bolzano Villettri has presented on the market – have solved the problem of numerous distortions and offer unique sound quality. When two contra-directional drivers produce the same phase of signal wave and the horizontal sound extends in the same pattern right and left this creates more efficient and vivid sound as compared to traditional loudspeaker systems.

The sound picture, extremely distinct and panoramic with wonderful localization of music images, gives the Torre a dominant position within a whole home theater set and also emphasizes the exceptional sonic potential of the speaker in a stereo mode: such sublime speakers that leave all others in awe of them! When the recordings come to an end, all that lingers are long-lasting, unforgettable impressions.

Torre is not only a technological highlight; it also gets points for design. At the show, Torre comes in Mahogany Root, stressing the aristocracy of the refined lines and belonging of the brand to the upper class.

*Bolzano Villettri has recently been known on the world market as the top-level manufacturer of Hi-End and Hi-Fi loudspeakers, notable for its new counter-aperture principle of loudspeaker construction. The company's coming new series are going to thrill the hearts of audiophiles even more.*

**HF 3005 TORRE**  
**Technical Specifications**

<b>Description</b>	<b>2-way floorstanding vented-box system</b>
<b>Drive units</b>	<b>2x8" polypropylene cone bass/midrange</b>
	<b>2x1.125" soft dome tweeter</b>
<b>Frequency response</b>	<b>32-20 000 Hz</b>
<b>Sensitivity</b>	<b>92 dB/W/m</b>
<b>Nominal impedance</b>	<b>4 Ohms</b>
<b>Recommended amplifier power</b>	<b>50-200 W</b>
<b>Dimensions</b>	
<b>Height</b>	<b>63.1" (1603mm)</b>
<b>Width</b>	<b>16.3" (415mm)</b>
<b>Depth</b>	<b>16.3" (415mm)</b>
<b>Net weight</b>	<b>55 kg</b>
